Plant and Soil

CONTENTS Vol. 146, Nos. 1–2, 1992

D. M. Wheeler, D. C. Edmeades, R. A. Christie and R. Gardner, Comparison of techniques for determining the effect of aluminium on the growth of, and the inheritance of aluminium tolerance in wheat 1

D. M. Wheeler, D. C. Edmeades, D. R. Smith and M. E. Wedderburn, Screening perennial ryegrass from New Zealand for aluminium tolerance 9

I. M. Rao, W. M. Roca, M. A. Ayarza, E. Tabares and R. Garcia, Somaclonal variation in plant adaptation to acid soil in the tropical forage legume *Stylosanthes guianensis* 21

P. W. G. Sale, D. I. Couper, P. L. Cachia and P. J. Larkin, Tolerance to manganese toxicity among cultivars of lucerne (*Medicago sativa* L.) 31

J. R. Crush and J. R. Caradus, Response to soil aluminium of two white clover (*Trifolium repens* L.) genotypes 39

W. J. Horst, C. Currie and A. H. Wissemeier, Differences in calcium efficiency between cowpea *(Vigna unguiculata* (L.) Walp.) cultivars 45

J. W. Johnson and R. E. Wilkinson, Wheat growth responses of cultivars to H^+ concentration 55

D. M. Wheeler, D. C. Edmeades, R. A. Christie and R. Gardner, Effect of aluminium on the growth of 34 plant species: A summary of results obtained in low ionic strength solution culture 61

A. H. Wissemeier, A. Diening, A. Hergenröder, W. J. Horst and G. Mix-Wagner, Callose formation as parameter for assessing genotypical plant tolerance of aluminium and manganese 67

F. P. C. Blamey, N. J. Robinson and C. J. Asher, Interspecific differences in aluminium tolerance in relation to root cation-exchange capacity 77

D. M. Wheeler, D. J. C. Wild and D. C. Edmeades, Preliminary results from a microscopic examination on the effects of aluminium on the root tips of wheat 83

R. A. Richards, Increasing salinity tolerance of grain crops: Is it worthwhile? 89

C. L. Noble and M. E. Rogers, Arguments for the use of physiological criteria for improving the salt tolerance in crops 99

A. R. Yeo, Variation and inheritance of sodium transport in rice 109

M. Taeb, R. M. D. Koebner, B. P. Forster and C. N. Law, Association between genes controlling flowering time and shoot sodium accumulation in the Triticeae 117

S. R. Sykes, The inheritance of salt exclusion in woody perennial fruit species 123

M. E. Rogers and C. L. Noble, Variation in growth and ion accumulation between two selected populations of *Trifolium repens* L. differing in salt tolerance 131

S. D. Tyerman and D. P. Schachtman, The role of ion channels in plant nutrition and prospects for their genetic manipulation 137

W. J. Hurkman, Effect of salt stress on plant gene expression: A review 145

T. J. Flowers and D. Dalmond, Protein synthesis in halophytes: The influence of potassium, sodium and magnesium in vitro 153

G. D. Batten, A review of phosphorus efficiency in wheat 163

S. E. Smith, A. D. Robson and L. K. Abbott, The involvement of mycorrhizas in assessment of genetically dependent efficiency of nutrient uptake and use 169

A. E. Da Silva and W. H. Gabelman, Screening maize inbred lines for tolerance to low-P stress condition 181

A. E. Da Silva, W. H. Gabelman and J. G. Coors, Inheritance studies of low-phosphorus tolerance in maize (*Zea mays* L.), grown in a sand-alumina culture medium 189
J. R. Caradus, A. D. MacKay, S. Wewala, J. Dunlop, A. Hart, J. van den Bosch, M. G. Lambert and M. J. M. Hay, Inheritance of phosphorus response in white clover (*Trifolium repens* L.) 199
J. R. Caradus, Heritability of, and relationships between phosphorus and nitrogen concentration in shoot, stolon and root of white clover (*Trifolium repens* L.) 209
A. A. Meharg and M. R. MacNair, Polymorphism and physiology of arsenate tolerance in *Holcus lanatus* L. from an uncontaminated site 219
B. Feil, R. Thiraporn and P. Stamp, Can maize cultivars with low mineral nutrient concentrations in the grains help to reduce the need for fertilizers in third world countries? 227
N. T. Hoan, U. Prasada Rao and E. A. Siddiq, Genetics of tolerance to iron chlorosis in rice 233
R. D. Graham, J. S. Ascher and S. C. Hynes, Selecting zinc-efficient cereal genotypes for soils of low zinc status 241
J. G. Paull, R. O. Nable and A. J. Rathjen, Physiological and genetic control of the tolerance of wheat to high concentrations of boron and implications for plant breeding 251
A. Bagheri, J. G. Paull, A. J. Rathjen, S. M. Ali and D. B. Moody, Genetic variation in the response of pea (*Pisum sativum* L.) to high soil concentrations of boron 261
R. F. M. van Steveninck, M. E. van Steveninck and D. R. Fernando, Heavy-metal (Zn, Cd) tolerance in selected clones of duck weed *Lemna minor*) 271
P. J. Jackson, E. Delhaize and C. R. Kuske, Biosynthesis and metabolic roles of cadystins $(\gamma\text{-EC})_nG$ and their precursors in *Datura innoxia* 281
N. J. Robinson, I. M. Evans, J. Mulcrone, J. Bryden and A. M. Tommey, Genes with similarity to metallothionein genes and copper, zinc ligands in *Pisum sativum* L. 291
